

MANAGING CONSTRUCTION CONTRACTS

CONTRACT
MANAGEMENT
TRAINING

2-DAY POWERCOURSE

Contract Management Training presents this in-depth guide to construction contract administration. Over 2 days, participants will receive clear insights into all aspects of **managing and administering construction contracts**, including variations, payment and quality issues and extensions of time.

WHO WILL BENEFIT FROM THIS TRAINING?

All personnel engaged by asset owners, contractors and subcontractors, including:

- Superintendents and their Representatives
- Project managers
- Site supervisors
- Engineers
- Architects
- Quantity surveyors
- Procurement and contract managers
- Anyone overseeing works and services contracts

WHAT WILL THE TRAINING INVOLVE?

The course covers time, cost and quality in deeper detail, effectively launching participants into the next level of contract management and equipping them with essential skills to effectively administer construction contracts under their supervision. Australian Standard construction contracts AS 2124-1992 and AS 4000-1997 are used as reference contracts throughout the course.

ABOUT YOUR PRESENTER

Contract Management Training is a specialist supplier of practical short courses in the management and administration of works, services and construction contracts. Our training courses are designed and delivered by leading contract management specialists and trainers with over 40 years contract management experience. Our trainers ensure a lively, engaging presentation style with clear explanations of complex concepts relevant to enhancing and empowering site supervision and contract administration.
